DETAILED ACTION

Claims 44-53 are pending in this application.

Drawings

1. The drawing(s) filed under 37 CFR 1.184 or 1.152 are accepted by the examiner.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on November 22, 2004 and June 13, 2005 was noted and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 44-53 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 5, 7, 9 and 13 of U.S. Patent No. 6,780,424. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the patent are directed towards a drug delivery system comprising a coating having a "bulk" polymer phase (poly(ethylene-co-vinyl alcohol)) and a "polymer rich drug" phase (polyethylene oxide). The difference is that the instant application recites that the coating is a graft polymer having a main chain and a side chain with different solubility's, as to cause phase separation on the device. Although, the patent does not explicitly teach that the polymer is a graft type polymer it does recite that the polymers form two distinct phases in which one comprises a therapeutic agent and has a different degrees of solubility's.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 44 is rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al. (US 5,610,241).

Art Unit: 1616

Lee et al. discloses reactive graft polymers for use in surgical implants, pins, screws, etc. consisting essentially of a biodegradable homopolymer or copolymer backbone joined with a side chain amino group (abstract). Column 8, lines 32-44 teaches that a drug may be coupled to the amino acid grafted polymer.

Conclusion

5. Claims 44-53 are rejected.
